Golf Course News From the Superintendent

It is starting to feel like fall in Florida with dry air and cooler temps. Everyone is ready to spend as much time outdoors as they can and with the change of seasons brings a bright fresh new look around Worthington to kick off the 2024 / 2025 season.

Last week the pine straw was installed around the golf course and the common grounds. Its reddish-brown color really frames the landscape and provides great definition as you look down the fairways from the tees. Mulch will also be installed around the club house and parking lot next week. The cabana and pool area has had some landscape improvements, the trees along the cart barn wall were replace as several had died from disease. The soil was removed and replaced to limit the transfer of the soil disease Ganoderma

to the new trees. All the potted plants were refreshed to bring some additional color to the area, we also replaced additional landscaping around the pool deck to keep the area looking its best. The landscape and hard-scape lighting is being repaired, replaced or receiving some additions to update the area and increase the night time enjoyment of members and guests.

The flowers around the common grounds, club house, and golf course were completed this week. There was a slight delay in the delivery of the material this year due to hurricane Milton, but

they will still look great as they fill in just in time for the holiday season. Happy Halloween from everyone at golf course maintenance.
